The JOURNAL *of* GEOGRAPHY

CONTENTS FOR JANUARY, 1937

Facets of Fjord Economy: A Study in Life on Sogne Fjord, Norway. By W. Elmer Ekblaw 1

Dr. Ekblaw, who is professor of human geography, and plant and soils geography at Clark University, makes northwestern Europe his major field of regional interest, and is personally acquainted with all the countries fronting upon the North and Baltic Seas. He is Assistant Editor of Economic Geography.

This is the fifth contribution to our series on the geography of Europe. Next month "The Bulgarian Valley of Roses" will be discussed by Mr. Henry J. Bruman of the University of California.

Pedals and Sails: The Log of a Different Sort of Trip to Europe. By Robert Andrews 17

Mr. Andrews is a senior student in the department of natural sciences, Principia College of Liberal Arts. His interest in geography was aroused by contact with Dr. Douglas C. Ridgley while he was serving as visiting professor of geography, 1935-36. The article narrates a trip made in 1935, one of several trips resulting from contacts made thru international correspondence.

Saigon, French Indo-China. By Shannon McCune 24

Mr. McCune was born in Chosen and spent many years in the Far East. He is now pursuing his graduate studies at Syracuse University, under Dr. George B. Cressey, specializing in the geography of the Far East. His article, "Chosen: The Land and People" appeared in the JOURNAL in November, 1935.

Recognition of Climate Types. By T. W. Birch 34

Mr. Birch received his bachelor of science and master of science degrees at the University of London, and a master of education degree at Durham University. He has made several contributions to educational geography which have appeared in *Geography*. Recently he published "The Afforestation of Britain" in *Economic Geography*, January, 1936. At present he is Geography Master at Gateshead Secondary School, County Durham.

Editorial Notes and News 38

Geographical Publications 40

Contents of the JOURNAL are indexed regularly in the *Educational Index to Periodicals.*

Authors alone are responsible for opinions and statements in the JOURNAL.

MAPS an Outstanding Feature of OUR WORLD AND OURSELVES

In this richly complete series

- **the maps of the Physical-Political type are not only accurate and clear but also remarkably attractive and artistic**
- **the beautiful colors and shading employed to show elevation conform to the International Map of the World and to the finest atlases**
- **over 190 "special purpose" maps give the industrial information which too often clutters up political maps**
- **with *Our World and Ourselves* for geography study there is no confusion between the study of the maps in the books and the usual wall map equipment**
